

Changeover Valves

Standard & Tandem Valves

SchuFI 

Applications

- Refining, Polymer, Chemical, Petrochemical and Offshore industries
- Part of plant safety dual pressure relief systems
- Located e.g. on storage tanks, in pumping or fluid transfer systems, between multiple heat exchangers or dual filtration systems.

Advantages

- Switch over quickly and efficiently from one relief valve system to another
- Shorter transfer time in hostile plant environments provides greater worker safety
- No production system shutdown

Offshore
Changeover Valve

Changeover valves in the workshop

KEY FEATURES

- Sizes: 1" to 10", larger on demand
- Pressure rating: up to ASME #2500
- Leakage rate to process: Class V or VI
- Temperature rating: from -60 to +500°C
- Pressure drop: <3%, <1
- Improved body design for lower weight and Zeta value
- Material: Carbon steel and Stainless Steel as standard
- Disc and seat metal sealing as standard
- Manual actuation as standard

Design Options

- Included reducers for safety valve mounting
- Bellow sealing for zero leakage to atmosphere
- Flushing valves
- Bleed/vent valves
- Heating jacket
- Automated actuation
- Special materials available on request
- Material according to NACE standard available

Flushing connection/valve

Dimension Sheet Type 60WN (ASME 150-300# / PN16-40)

All dimensions are in mm.

Dimensions are for max PN40/ASME300# at 400°C/750°F.
Seats are integral part of Valve bodies.

ϕD , W, W1 and P vary acc. to operating conditions.
Max ϕD is acc. to pressure class 300# at 400°C.
Min ϕD is acc. to pressure class 150# at 400°C.

NOTES:

- ^(a)approx. weights;
- *actuator with rising handwheel;
- other actuators with non-rising handwheel and spindle protrudes "P" mm if disc seals at side B;
- from 1" to 2" different valve design without guide rod (side A) and disc with fins.
